

Soph Morgulchik

30 Bobby Jones, St Andrews, KY16 8TJ | 07553 802 366 | sofia.morgulchik@gmail.com

EDUCATION

- 2023 – present **University of St Andrews, St Andrews, United Kingdom**
*Degree: **Computer Science Bsc (Honours)** – 91% average | Dean's List*
- 2021-2023 **Brighton College, Brighton, United Kingdom**
*A level results: **A*A*AA** in Mathematics, Further Mathematics, Physics and Psychology*
Headmaster's award for top academic performance
TEDx Brighton College – “Our Strive for Machine Intelligence and Its Consequences”

WORK EXPERIENCE

- 2025 (June – August) **Computer Science Tutor (Full Time) — FunTech Coding Summer Camp, Remote**
- Taught weekly courses in **Java**, **Python Game Development** (Pygame), **Unity** and an **AI/ML** course (TensorFlow & Keras) covering topics like neural networks, classifiers, regression and data selection.
- 2025 (April) **Spring into Software Engineering Insight Week — JPMorgan Chase, London**
- Selected from 12,700 applications (**1.4%** acceptance rate)
 - Developed backend services in **Flask** for a **React Native** mobile app during the **Code for Good Hackathon**, enabling a non-profit to digitally showcase the National Plant Archive and increase public engagement.
 - Received **return offer** for Summer Software Engineering Internship.
- 2024 (June – August) **Coordinator (Full Time)— FunTech Coding Summer Camp, Barbican, London**
- Managed a location of **30+ students** aged 7-15 and a **team of 5-8 tutors**, serving as the main liaison between HQ, parents, students and staff.
 - Oversaw daily operations, resolved logistical technical, behavioural and medical issues, ensuring smooth running of the camp.
 - Delivered and coordinated lessons in **Python**, Cyber Security (**Kali Linux**), and Game Development using **Unity** and **Unreal Engine**, building **interactive 2D and 3D environments**.
- 2022 (July) **Data Summer Bootcamp — Palantir Technologies, London**
- Project to help the UK handle future wildfires. Graphically analysed different global data sets with Foundry, provided recommendations for planning for wildfire. Achieved **1st place** in the project competition based on the report and presentation.

COURSES & QUALIFICATIONS

- 2024 **CS50's Introduction to Programming with Python (online Harvard course)**
- 2022 **AI in Astrophysics by Skills Gap (4 hr online workshop)**
- Built a convolutional neural network to reduce noise from space images.

PROJECTS & INITIATIVES

- 2025 - present **Co-Founder & Frontend Developer of AlgoBoost**
- Established a student society focused on improving algorithmic-problem skills and preparing members for technical interviews.
 - Develop the frontend of the society website using **React & CSS**.
 - Organise weekly workshops and manage social media presence.
- 2024 - present **Contributor, Conjure-Oxide (Open-Source Constraint Modelling Tool)**
- Collaborate with professors, postdoctoral researchers, and students at the university of St Andrews to develop a **Rust**-based automated modelling tool for **Constraint Programming**.
 - Work on a **Language Server Protocol (LSP)** for the Essence input language, providing real-time error detection and clear, user-friendly diagnostics.

TECH STACK: Java · Python · Rust · C · C++ · React · CSS · SQL · AI/ML · Unity (C#) · Unreal Engine

HOBBIES: Competitive speed-cubing (15s average) · Public speaking (TEDx speaker) · Martial arts
